Summary

Full Stack Software Engineer over 7 years of experience building and maintaining web applications using a variety of technologies, including HTML, CSS, JavaScript, and various frameworks such as React, Angular, and Node.js. Skilled in developing and integrating RESTful APIs, working with databases (such as MySQL and MongoDB), and utilizing version control systems like Git. Strong understanding of web development best practices and security principles.

Experience

Software Engineer, ICE Mortgage Technology
January 2016 - Present

- Participated in moving the largest mortgage software application in the country from a desktop client to the web using React.
- Maintained complex technology infrastructure and collaborated with product team to implement new features and strategically plan for future products.
- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.
- Effectively coded software changes and alterations based on specific design specifications.
- Updated and maintained desktop application built on the Electron framework giving customers simpler workflows.
- Helped migrate hundreds of web pages from AngularJS to Angular.
- Collaborated with other development teams on cross-team projects to quickly meet deadlines.
- Regularly conducted code reviews to help ensure excellent code quality.

Education

Software Engineering, Utah Valley University
August 2013 - April 2019
